Academic Year: 2026-2027			
Program: Computer Engineering			
Year of Study	Second Year	Semester	III
Course Name	Skill Based Lab - III (Web Technology II)	Course Code	CMLOR2VS201
Name	Tanmay Nilesh Shinde	Roll No	67
Class & Div & Batch	SYCM1-B	PRN No.	126BTCM2008

Experiment No: 3	
Aim	Create a webpage that consumes a REST API
Learning Outcome	Develop skills to fetch and display external data from REST APIs in a web page
Program	

```
<!DOCTYPE html>
<html>
<head>
  <title>Load Users</title>
</head>
<body>
  <h2>User Information</h2>
  <button onclick="loadUsers()">Load Users</button>
  <br><br>
  <table border="1" cellpadding="10">
    <tr>
      <th>Name</th>
      <th>Email</th>
      <th>City</th>
    </tr>
    <tbody id="userTable"></tbody>
  </table>
  <p id="error"></p>
  <script>
    function loadUsers() {
      fetch("https://jsonplaceholder.typicode.com/users")
        .then(response => {
          if (!response.ok) {
            throw new Error("API Error");
          }
          return response.json();
        })
        .then(users => {
          let table = document.getElementById("userTable");
          table.innerHTML = "";
```

```
            users.slice(0, 5).forEach(user => {
              let row = `<tr>
              <td>${user.name}</td>
              <td>${user.email}</td>
              <td>${user.address.city}</td>
            </tr>`;

              table.innerHTML += row;
            });
          })
          .catch(error => {
            document.getElementById("error").innerHTML =
              "Unable to load users";
          });
      }
    </script>
</body>
</html>
```

Output

User Information

Load Users

Name	Email	City

User Information

Load Users

Name	Email	City
Leanne Graham	Sincere@april.biz	Gwenborough
Ervin Howell	Shanna@melissa.tv	Wisokyburgh
Clementine Bauch	Nathan@yesenia.net	McKenziehaven
Patricia Lebsack	Julianne.OConner@kory.org	South Elvis
Chelsey Dietrich	Lucio_Hettinger@annie.ca	Roscoeview

Review Questions

Q1. Write a program to Create a button called "Load Quote".
On click, fetch a random quote from:
🔗 https://api.quotable.io/random
Display the quote and author on the page.

Ans :

```
<!DOCTYPE html>
<html>
<head>
   <title>Random Quote</title>
</head>
<body>
   <h2>Random Quote Generator</h2>
   <button onclick="loadQuote()">Load Quote</button>
   <h3 id="quote"></h3>
   <p id="author"></p>
   <script>
      function loadQuote() {
         fetch("https://api.quotable.io/random")
            .then(response => response.json())
            .then(data => {
               document.getElementById("quote").innerHTML =
                  data.content;
               document.getElementById("author").innerHTML =
                  "Author: " + data.author;
            })
            .catch(error => {
               document.getElementById("quote").innerHTML =
                  "Unable to load quote";
            });
      }
   </script>
</body>
</html>
```

Q2. Write a program to Fetch and display a random dog image from:
🔗 https://dog.ceo/api/breeds/image/random
Show the image using an <img> tag.

Ans :

```
<!DOCTYPE html>
<html>
<head>
  <title>Random Dog Image</title>
</head>
<body>
  <h2>Random Dog Image</h2>
  <button onclick="loadDog()">Load Dog</button>
  <br><br>
  <img id="dogImage" width="300" alt="Random Dog">
  <script>
    function loadDog() {
      fetch("https://dog.ceo/api/breeds/image/random")
        .then(response => response.json())
        .then(data => {
          document.getElementById("dogImage").src =
            data.message;
        })
        .catch(error => {
          alert("Unable to load dog image");
        });
    }
  </script>
</body>
</html>
```

<table>
<tr>
<td></td>
<td>

</td>
</tr>
<tr>
<td>Conclusion</td>
<td>Thus, we successfully created webpages using JavaScript fetch() to consume REST APIs and retrieve external data, displaying random quotes with their authors and random dog images without reloading the webpage.</td>
</tr>
</table>
